

AirportIQ[®]

Business Manager

Can finance and commercial groups work together?

AirportIQ Business Manager (ABM)

GCR's ABM helps manage nearly all aspects of your airport's commercial activity and revenue streams. It handles agreements, leases, aeronautical and non-aeronautical activity.

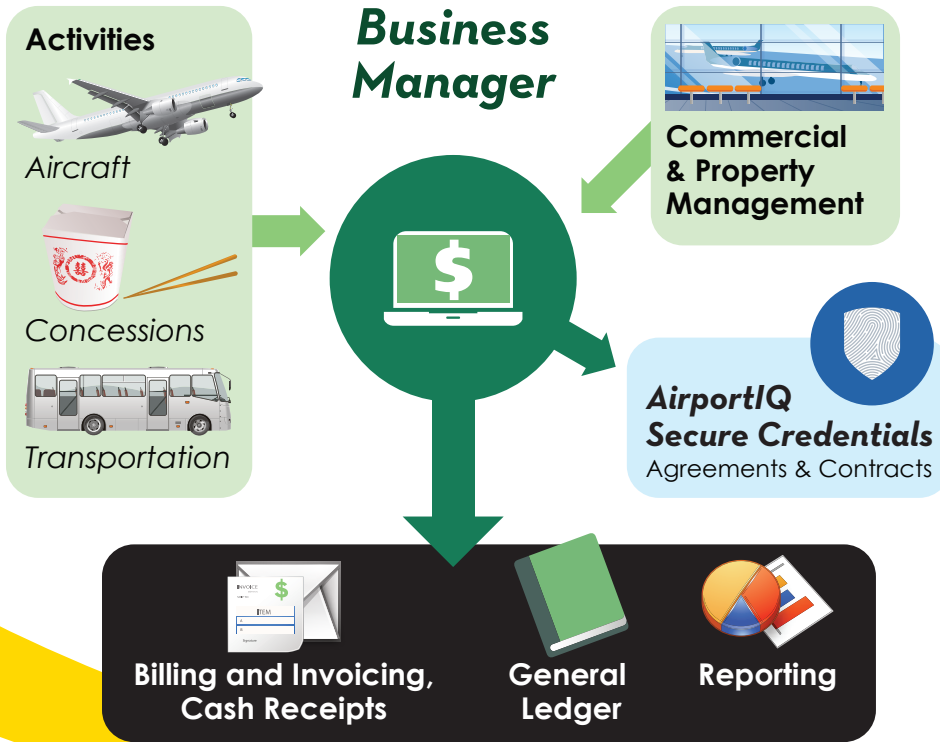

BUSINESS

ABM is a comprehensive set of modules that can manage revenue, accounts receivable, contracting, property, and statistical aspects of an airport's business.

"ABM has been built from the ground up with today's airport manager and the modern commercial environment in mind."

- Ray Ceasar, CPA
ABM Product Manager

Imagine your commercial managers and finance team looking at the same integrated, comprehensive data on agreements, contracts, rates, rules, and revenue - all at the same time.

Imagine being able to apply an across-the-board rate increase with a simple key-stroke. Then imagine being able to report to management on the performance of commercial activities of the airport in real time.

AirportIQ Business Manager offers visibility into all your business activities to help pinpoint effective means of generating revenue.

ABM core capabilities:

- Manages agreements, spaces and customers and their contacts
- Tracks rates and charges
- Handles billings, invoicing, accounts receivables, and cash receipts
- Integrates with all ERP/ Financial Management Systems
- Produces auditable financial transactions
- Provides airport activity statistics and ad-hoc reporting with intelligent "to-do" alerts
- Provides summaries for executive management
- Utilizes integrated GIS space management module
- Provides real-time reporting of key organizational analytics to different user groups
- Integrates with AirportIQ Secure Credentials to provide the industry's first major closed-loop badging management system
- Optionally, integration with external sources of automated billing for aircraft landing and ground transportation
