

AirportIQ[®]

Safety & Operations Compliance

Want to stay informed about everything?

AirportIQ Safety & Operations Compliance System (ASOCS)

GCR's ASOCS tracks and manages critical inspections and incidents, operational logs, SMS, and security and activity information for your airport.

OPERATIONS & SAFETY

ASOCS provides an operations, safety, law enforcement, information management, and enterprise-wide communications system.

“We designed ASOCS so you can stay fully informed about the most important issues, while keeping in compliance with critical FAA reporting.”

- Tom Schuessler
ASOCS Product Manager

Imagine saving time by completing inspections, saving photos and generating work requests in real time with mobile tablet computers.

Imagine operational, security, safety, and maintenance personnel all accessing the same data when completing Part 139 inspections.

AirportIQ Safety & Operations Compliance System combines Part 139 compliance with operational management and SMS into a single, integrated capability that minimizes risk, increases safety, and provides one system of record for FAA compliance.

ASOCS core capabilities:

- Features Part 139 inspection and FAA reporting
- Tracks incidents and events with integrated GIS mapping
- Provides document and image repository
- Follows work requests from creation to completion
- Assigns work shifts
- Manages maintenance and operations inspections
- Handles wildlife compliance
- Tablet mobile app runs in both on- and off-line modes
- Offers “one click” review of outstanding entries
- Features dashboard analytics and advanced search engine
- Provides automatic alerts, email, and ad-hoc reporting
- Features screen designer for common and custom forms
- Integrates with most enterprise asset management solutions for management of work requests
