

AirportIQ[®]

GCR's aviation experts have provided solutions to the aviation industry for over 30 years. Our **AirportIQ** suite is a family of connected software solutions built to help you manage your airport, comply with federal regulations, and give you the information you need to make better decisions.

BUSINESS

AirportIQ Business Manager (ABM) helps manage nearly all aspects of your airport's commercial activity and revenue streams. It handles agreements, leases, aeronautical and non-aeronautical activity.

OPERATIONS & SAFETY

AirportIQ Safety & Operations Compliance System (ASOCS) tracks and manages critical inspections and incidents, operational logs, SMS, and security and activity information.

Expand as you grow, with optional modules:

SECURITY

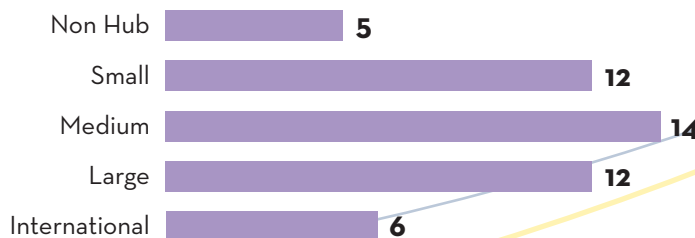

AirportIQ Secure Credentials (ASC) is a fully integrated Credentialing solution that manages biometric credentialing, badging, continuous vetting, auditing, and access management.

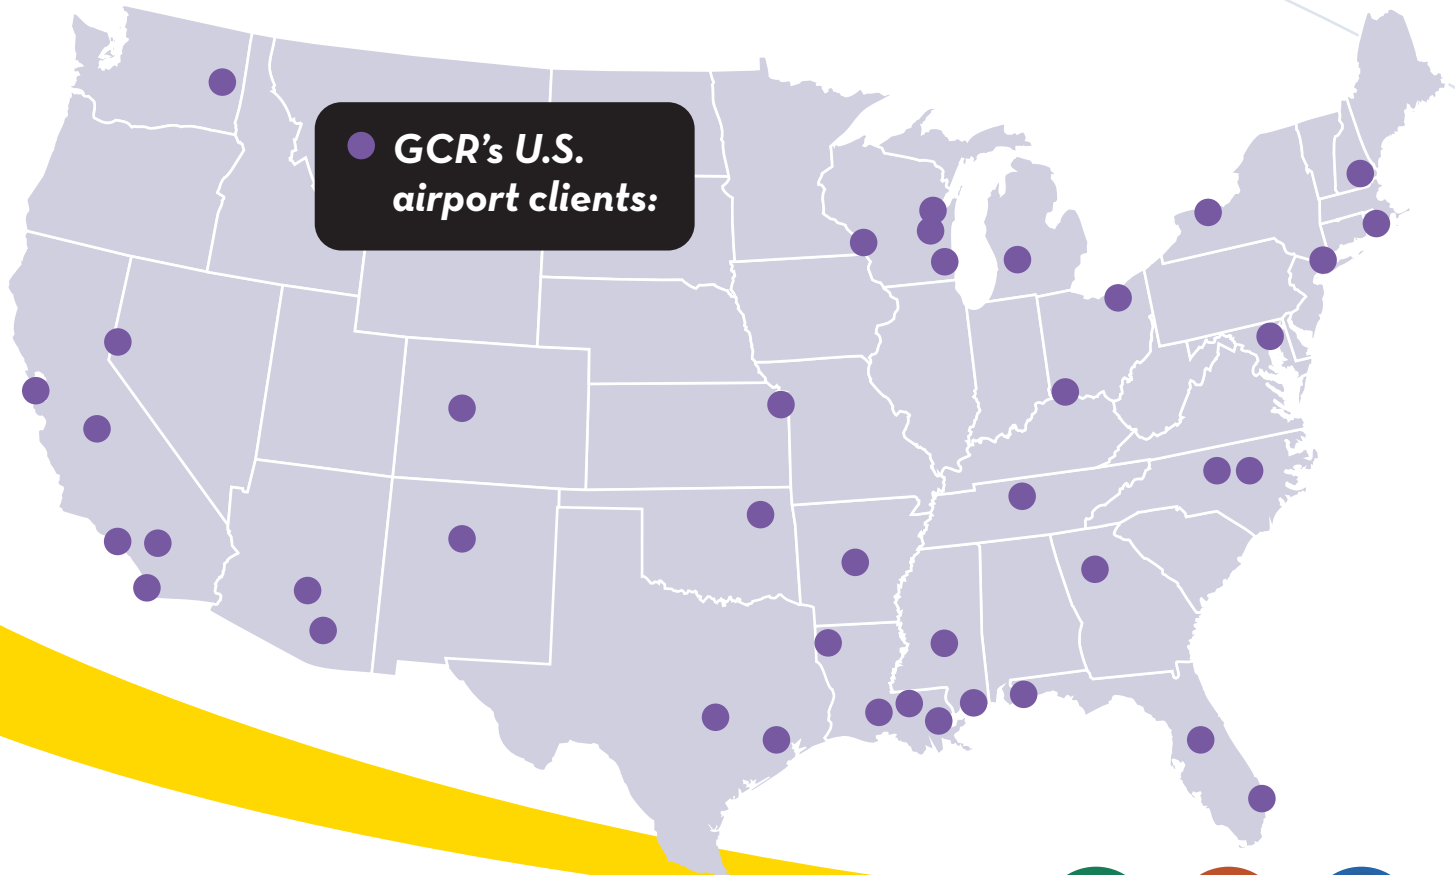

Airport Project Manager (APM)
Manages major capital improvement programs.

AirportIQ Insight Portal Provides KPIs and performance metrics across the organization.

AirportIQ is used at airports of all sizes:

We serve airports and airlines of all sizes worldwide, plus federal, state, and local governments. We are accredited aviation and airport professionals, CPAs and software experts with decades of experience, and are committed to help you achieve compliance and advanced operational efficiency.
