## Safety Management

Need to manage risk in an evolving regulatory climate?

### AirportIQ Safety Management System (SMS)

SMS offers a flexible process that guides risk management in accordance with FAA guidelines. With AirportIQ SMS, airport staff can easily work together to report and mitigate safety issues.

## SAFETY COLLABORATION

Triage, track, and analyze safety issue reports as they are received through the AirportIQ SMS Dashboard. Spot incident trends to help determine which warrant corrective action.

***“SMS is what you need to jump-start your program in accordance with FAA guidelines. It easily lets you maintain compliance and manage risk.”***

## Safety Management System (SMS)

**Schedule 70**  
Contract GS-35F-0481V

**AirportIQ Safety Management System (SMS)** is the industry-leading safety compliance tool. It follows the FAA's new SNPRM - Safety Management Systems for Airports - and comes with a guaranteed no cost upgrade to comply with the final rule.

It provides you with the information you need to identify safety trends step-by-step and the ability to demonstrate proactive action being taken. It integrates with event management and Part 139 software and provides a central point of operational safety monitoring, risk management, and compliance.

## AirportIQ SMS core capabilities:

- Developed with input from small, medium and large hub airport safety managers
- Anonymous and proactive/reactive reporting is built in
- Web/mobile interface for reporting of safety issues
- Powerful GIS and search capability with ESRI technology
- Allows collaborative, multi-user access at the same time
- Online database for procedures and requirements, safety hazmat, and training manuals
- Part 139 system integration with AirportIQ Safety & Operations Compliance System (ASOCS) or your current system
- Configurable, meaningful KPIs and metrics
- EAM work order system integration
- Configurable dashboard, accident and injury forms
- Assign, email, and monitor SMS issues and reports
- Store PDFs and images to attach to forms in the Cloud
