![FusionStak — Think Forward]

Think forward.

Every problem has a solution — **It's our job to find it.**

We solve problems
to completely transform the way our clients work regardless of industry, vertical, seasonality or specialty.

We challenge 'normal'
by taking the old, antiquated processes that businesses see as standard and completely reinvent them.

THINK FORWARD

Transformative solutions

IDEAS

Continued creativity

EXECUTION

SUPPORT

Strong partnerships

We build innovative solutions for Public Safety, State and Local Government, and Industrial Construction markets.

Our award-winning solutions have become nationally recognized and used in their respective industry.

Cloud Computing

We build innovative products using the latest cloud technologies to solve real world problems.

Data Insight

We design and build data warehouses and provide insight to the data using advanced visualization.

Custom Development

We build custom solutions that fit the exact needs of our clients. We also develop seamless integration with off the shelf products.

Mobile Development

Our professionals are experienced in building both iOS and Android applications.

Consulting

We offer expert advice on how to best use modern technologies to enhance the efficiency and effectiveness of your organization.

Strategic Staffing

We provide IT resources for an entire project or for specific client needs.

What our clients are saying…

"FusionStak has helped us reach all new levels of efficiency and productivity. Their professionalism and expertise are second to none!"

Micah Triche
LAPCO Manufactoring

"FusionStak consultants do a great job and continue to provide great support for the maintenance of our application."

Shelly Guilbeau
Gulf Coast Safety Council

"The FusionStak team has become a critical part of our technology infrastructure. We are always able to count of them to deliver the results we expect"

Eric Deroche
St. James Parish Government
