

## Access when you need it

**LENS** allows officers to share **critical data**, in real-time, across jurisdictional boundaries.

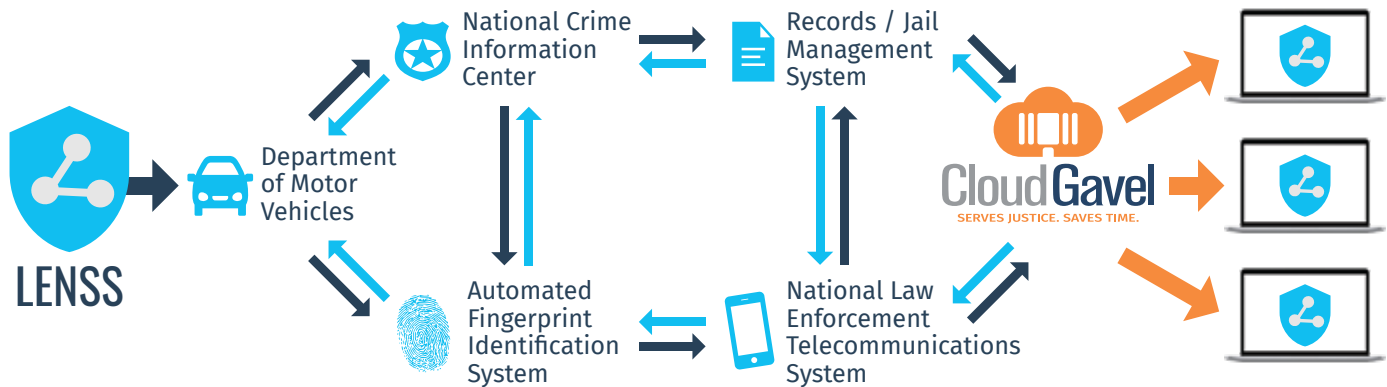

As officers, your lives depend on **timely access to information**. It's one of the reasons why we created the **LENS** system.

**LENS** is a simple and secure **cloud-based solution** that's accessible from any internet enabled device.

**LENS** offers **no long-term contracts**, no hidden fees, and no hardware to install or maintain.

**LENS** saves you **time** and money.

# LENSS is a mesh network of critical data across agencies

## LENSS is a law enforcement network sharing solution

### Get DMV, NCIC, iii, and AFIS access

Access all key data sources from one solution that runs on any browser or mobile device.

### Send and receive actionable intelligence

**LENSS** is the ONLY system that allows officers to take the information they gather everyday in their subject packets, FI Cards, and investigative notes and share it with fellow officers across the jurisdictional boundary and across the nation – instantaneously.

### Make positive identifications

Our **Subject Packets™** accurately identify persons, associates, vehicles, addresses, telephone numbers, currency, and more using common identification numbers like driver's license, state identification card, SSAN, license plate, VIN, address, telephone, and serial numbers.

### Electronic Field Interview Cards

The **Electronic Field Interview Card** is a cumulative record, immediately accessible and searchable, to all officers nationwide. Once created, an officer is notified via text when any officer adds additional information to a FI card he created.

### Investigative Alerts

Like Amber Alerts, **Investigative Alerts** are push notifications which expedite the dissemination of critical, time-sensitive information relating to emergencies and situations like active shooters, armed robberies, bank robberies, missing persons, and other violent crimes.

### Search everything

**LENSS** provides officers with a place to store ALL of their information. Whether it be investigative notes, surveillance logs, FI cards, intuition, or just mere thoughts about a subject.
